

best_model_0 with constants calculated from viscosity

$$c_0 - c_1 e^{-\frac{1}{\theta}}$$

$$c_0(\eta) = 0.0208 \cdot \eta + 0.0879, \quad c_1(\eta) = 0.0236 \cdot \eta + 0.125$$

Original best_model_0 with fitted fluid-specific constants

$$c_0 - c_1 e^{-\frac{1}{\theta}}$$
